

District Leadership Team

Minutes

District Office

June 12, 2015

1:30

- Comptroller’s Audit—Michele shared that the auditors are still here. They were wrapping things up when they were assigned a new supervisor who pushed them to find something. They are looking at our new fuel tank system and our reserves.
- APPR—Lois initiated a conversation about the proposed changes. Three topics were discussed at some length:
 - The STA may want to change the rubric they are using for their observations since the Danielson rubric is so difficult to score a “highly effective” on, even the smaller sub-component areas.
 - We also discussed our concern with the fact that all local exams will have to measure growth and will require SED approval.
 - The other significant topic of conversation was the requirement for an independent evaluator. It appears that this can be someone in district who is assigned to a different building. We talked about perhaps assigning Marco (by BEDS code Only) to District Office and then having him serve as the independent evaluator for the whole district.
- Open Agenda
The STA shared a concern that the elementary teachers feel it is wrong to consider increasing Todd guidance while so many elementary teachers have lost their jobs and kindergarten sections are of concern.
- We established our next meeting date as Friday, October 2, at 1:30 in district office.
